The solenoid valve injectors allow up to ten individual injections per injection cycle for quiet and efficient combustion. The Bosch technology is proven millions of times over. The injectors are compatible across all pressure levels and enable a flexible rate shaping. Thanks to a robust design the injectors are suitable for selected and standardized country-specific fuel qualities.

Modular design for numerous applications

The solenoid valve injectors allow up to ten individual injections per injection cycle for quiet and efficient combustion. The Bosch technology is proven millions of times over. The injectors are compatible across all pressure levels and enable a flexible rate shaping. Thanks to a robust design the injectors are suitable for selected and standardized country-specific fuel qualities.

up to 2,500 bar pressure for high engine performance

lower consumption

and reduced emissions are made possible through short injection intervals.
