

# CRS2-25

Diesel injection system with solenoid injectors for a maximum pressure up to 2,500 bar

Powertrain systems and electrified mobility

Economical, powerful and designed for the future

up to  
**90 kW/l**

high engine power

**quieter  
combustion**

with up to eight individual injections per injection cycle

- ▶ The diesel injection system CRS2-25 offers a comfortable acceleration even at low speeds.
- ▶ The system enables an efficient power delivery within a wide speed range.
- ▶ The system supports compliance with Euro 6, Real Driving Emissions and comparable standards.
- ▶ A permanently available injection pressure that is independent of the speed and load allows the flexible selection of the injection start, quantity and duration.
- ▶ The common-rail system can be mounted simply on the engine.
