

Flexible charging cable for electric vehicles

Lightweight, flexible, without electronic box

The flexible charging cable for electric vehicle is the versatile, lightweight charging solution for all drivers of hybrid and electric vehicles.

lightweight

thanks to innovative electronic systems in the plugs instead of a bulky electronics box

versatile

includes plugs for every charging situation

- ▶ Versatile, portable cable for all commonly used charging options
- ▶ Low weight through integration of the electronics in the charging plugs
- ▶ Compact design saves space in the vehicle
- ▶ International charging standards IEC62752 and IEC62196
- ▶ Temperature monitoring and integrated RCD-A in the household plug
