

Vehicle charge communication unit

For use with electric vehicles and plug-in hybrid systems

Safe, secure, and flexible charging

state-of-the-art

Software and hardware solutions for all charging standards in a compact control unit

cost-efficient

A single control unit for both electric vehicles and plug-in hybrid systems

- ▶ Versatile variants for regional and customer-specific requirements
- ▶ State-of-the-art software and hardware solutions for all charging standards
- ▶ Proven solutions for cybersecurity and functional safety in accordance with ISO 26262 and up to ASIL B
- ▶ Cost-effective control unit for charging communication that can be deployed with great flexibility
